

# The Benefits and Wonders of Liquid Chlorophyll

The most marvelous and amazing benefit it gives comes from the fact that its molecular structure is absolutely identical to hemoglobin in human blood except for the center atom. Chlorophyll & Hemoglobin are very similar in structure; only difference being Chlorophyll has Magnesium as center and Hemoglobin has Iron as center; when Chlorophyll enters the body, the body recognizes this & replaces the Magnesium with Iron, hence an increase in blood count boosting our energy and increasing our well being almost instantly. Chlorophyll has the power to regenerate our bodies at the molecular and cellular level and is known to help cleanse the body, fight infection, help heal wounds, and promote the health of the circulatory, digestive, immune, and detoxification systems. Chlorophyll consumption increases the number of red blood cells and, therefore, increase oxygen utilization by the body. Liquid chlorophyll also reduces the binding of carcinogens to DNA in the liver and other organs.

## Other Liquid Chlorophyll Benefits

So in addition to helping to rebuild and replenish our red blood cells, liquid chlorophyll, being highly alkaline, also gives the body the following benefits:

- **Anti-Carcinogenic:** Chlorophyll protects against a whole host of carcinogens found in fungus-laden foods such as nuts and grains, the toxins from cooked meats, and air-borne carcinogens (from pollution). It blocks the metabolism in the body of harmful chemicals known as procarcinogens that damage DNA. Studies published in the journals [Carcinogenesis](#) and [Food and Chemical Toxicology](#) clearly display that chlorophyll inhibits carcinogenesis.

- **Antioxidant & Anti-inflammatory:** containing high levels of the vitamins A, C and E, liquid chlorophyll has strong [antioxidant](#) capacity and has also been found to help reduce inflammation.
- **Chelation of Heavy Metals:** chlorophyll is one of the most important chelates in nature. Its ability to bind to and remove toxic heavy metals such as mercury makes it an extremely powerful healer.
- **Antiseptic:** while liquid chlorophyll doesn't actually have antiseptic properties of its own, it, quite remarkably, DOES have the ability to aid our body's tissue in destroying germs. By strengthening tissue, it increases the disease resistance of cells and, at the same time, prevents the growth of bacteria!
- **Treats Bad Breath:** This one is a real bonus and really works! Chlorophyll has a double-action remedy for bad breath. Firstly, as a deodorizer, it will eliminate odors in the mouth and throat, but secondly (and more importantly) it promotes a healthy digestive tract – which is the primary reason for bad breath.
- **Rapid Delivery of Magnesium:** this has a highly alkalizing effect on the body and helps to deliver much needed oxygen to cells and tissues.
- **Contains vitamin K, C, folic acid, iron, calcium, protein:** which are all also essential in building and repairing red blood cells and boosting our immune system.
- Naturally cleanses the body of toxins & brings body's PH in balance.
- Heals wounds faster & reduces menstrual cramps.
- Most important chelate in nature; its ability to bind to & remove heavy metals such as mercury which makes it an extremely powerful.
- Refreshing & Gives better complexion
- Contains Vitamin K, C, Folic Acid, Calcium and Protein which are also essential in building & repairing red blood cells & rejuvenates the body at the cellular level .
- Reduces headaches.
